

FORMULA NISSAN 3000

THE CAR

Formula 1 Dallara chassis, with a “tamer” propeller able to release 420 Hp. It is the ideal means to test your driving capacity, as it gives you the feel of a fast single-seater car without reaching the extreme conditions of Formula 1 cars. Acceleration, braking and grip are amazing and they allow everyone to perform various laps in safe conditions after having spent the morning learning about Formula 3 cars, while giving the chance of improving your performance lap after lap. The camera car is available for the most passionate, so you can keep a unique memento of the experience.
